

Mobile Mat Washing

Strad's mobile mat washing system addresses strict environmental concerns when renting used mats or moving mats from one piece of land to the next on a project. Our state-of-the-art portable mat washing units can be available at site to clean a variety of mats such as wood mats, rig mats, and crane mats ranging from 4 feet wide to 40 feet long.

When working in sensitive environments, using a mobile mat washing system can help to stop the spread of noxious weeds or soil disease. And depending on the project need or site conditions, Strad can adjust the level of cleaning as required.
